**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of claims 1-12 and 32-43 in the reply filed on 13 February 2006 is acknowledged. The traversal is on the ground(s) that searching both sets of claims would not be a burden because a previous rejection under 35 U.S.C. 112 was entered for both sets of claims. This is not found persuasive because the previous search could not be completed, because the examiner was not able to guess what was the meaning of the term "ion region." Moreover, Applicant responded to the rejection by changing the term to read, simply, "region." Because this was a broadening amendment, the previous search would not be terribly reliable anyway. Examiner notes in addition that there is a large amount of prior art directed to the concept of ion implant through polysilicon, so that a search for two separate types of structures would be a burden even if there would be overlap in the search subclasses. Also, the two sets of claims do appear to be novel and/or unobvious in view of each other, hence separately patentable, and a requirement for election can properly be made at any time prior to a final rejection (37 CFR 1.142).

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-12 and 32-43 are allowed. The methods having steps as recited, including for example the step of forming adjacent gates with ion implant through poly at the contact hole, and the step of forming a second poly film on a first poly film that substantially fills a cell pad contact hole, is not taught in the prior art.

This application is in condition for allowance except for the following formal matters:

Nonelected claims 27-31 should be canceled, or other appropriate action should be taken.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
